### Network Administrator

Responsible for building and networking computer systems since 1978, beginning with S100 bus Z80 CP/M systems, through four of the first hundred genuine IBM PCATs sold to civilians, to today's PCI bus PCs, Macs, and Suns. Served as network administrator and/or internal support technician for programmers and staff at three corporations.

Recently completed network administration classes for Unix and Cisco.

Currently serving as coordinator for the sysops at Seattle Community Network.
